

NEWS LETTER

June 2025 Edition

From the Chairman's Desk: Innovation as the Core of Our Growth

Dear Team,

At Microfilter Polymers Ltd., we think that innovation is more than just a choice, it is the cornerstone of our success and identity. Staying ahead in today's quickly changing market, necessitates thinking forward and innovation becomes our most important asset.

Every move we take, whether it's developing innovative filtration technologies, automating our processes or committing to sustainability, is always motivated by a drive to improve, adapt, and lead. Our colleagues across departments continue to exhibit this mentality by discovering better solutions, accepting change and turning obstacles into opportunities.

Innovation is built into our culture, from how we serve our consumers to how we interact internally as well it allows us to not just meet any target but continually surpass expectations.

As we move forward, I encourage everyone to keep thinking creatively, questioning the current quo, and sharing fresh ideas. Remember, every major shift begins with a single daring notion

We must prioritise innovation in all aspects of our work to create a future worth being proud of. Encourage, colleges to give new/fresh ideas & listen to them even if it sound irrelevant at the first go.

Warm regards,

Mr. Shailendra Mangal

Chairman

Microfilter Polymers Ltd.

PP Dotted Spun Filter

The Microfilter PP Dotted Spun Filter is crafted from premium quality polypropylene material, ensuring reliable and consistent performance. Its unique dotted surface design enhances the overall filtration area, allowing for more efficient removal of dirt, sediments, and impurities. This advanced structure not only improves filtration efficiency but also extends the life of the filter. With its durable construction, the filter is built to withstand demanding conditions, making it ideal for domestic, commercial, and industrial applications alike.

Applications:

- RO system pre-filtration
- Industrial water treatment systems
- Gravity-based water purifiers
- Domestic water purification units

Benefits:

- Superior water purity and clarity
- Low maintenance and high performance
- Saves energy and reduces operating costs
- High dust holding capacity

Message from the Whole-Time Director: From Component to Confidence: Why Every Spare Part Matters

Dear Readers,

In the world of water purification, it's easy to focus on the big picture—pure, safe, and healthy water. But behind every drop that meets quality standards lies a network of carefully engineered components, each playing a critical role in ensuring system performance, reliability, and longevity.

At Microfilter, we believe that every spare part is a promise—a promise of trust, durability, and quality. Whether it's a precision-molded sediment filter, a high-rejection membrane, or a robust housing unit, each part contributes to the integrity of the entire RO system. A single compromised component can affect output quality, reduce efficiency, and lead to greater operational costs down the line.

That's why we don't treat spare parts as "spares," we treat them as **essential blocks building of customer confidence.**

Our approach is simple but uncompromising:

- ✓ Use only virgin-grade raw materials.
- ✓ Maintain strict quality control at every manufacturing stage.
- ✓ Innovate continuously to meet evolving challenges.
- ✓ Support customers with genuine products and clear traceability.

In this season of changing water conditions, I urge our partners, technicians, and end-users to remember: reliability begins at the component level. Choosing authentic, high-quality parts is not just about maintaining machines—it's about protecting health, ensuring compliance, and building long-term trust.

Together, let's continue delivering confidence—one component at a time.

Thank you for your continued partnership and belief in what we stand for.

With appreciation,

Mrs. Ritu Mangal

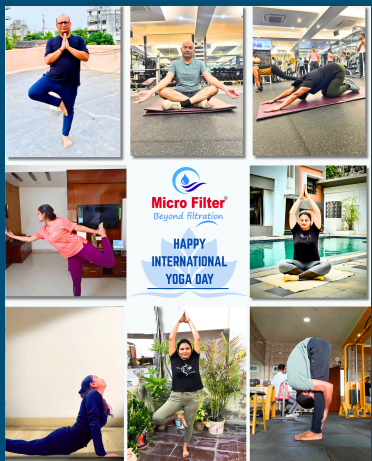

Whole Time Director

Microfilter Polymers Ltd.

Quote Of Month

"From every drop we filter, a cleaner tomorrow begins."

International Yoga Day (21 June)

Microfilter Polymers Ltd. celebrates International Yoga Day.

We, at Microfilter Polymers Ltd. believes in the balance of health and productivity. This International Yoga Day, we gladly salute our team members' dedication to managing their daily duties and office work while also making time for their well-being via regular yoga practice.

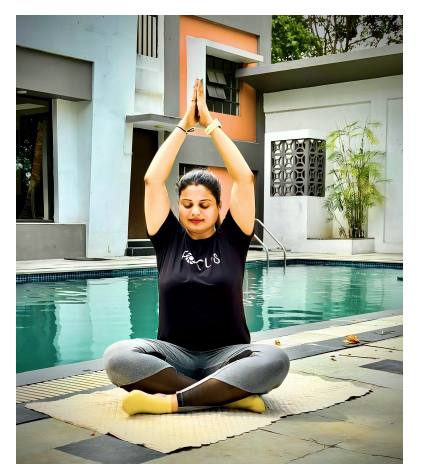

Yoga is more than simply a physical practice; it's a means to refresh the mind, enhance attention, and restore balance to our hectic professional life. Our staff continues to incorporate this holistic practice into their daily routine, demonstrating our shared values of discipline, wellbeing, and self-care.

Cheers to a healthier, happier, and more mindful workplace!

Message from Mrs. Ritu Patel – Company Secretary & Compliance Officer Yoga: The Key to Unlocking Work-Life Balance in a Fast-Paced World"

In the fast-paced world of today, striking a work-life balance is more important than before. Maintaining this balance can be difficult due to the ongoing demands of both personal and professional life; if left unchecked, it can result in reduced productivity. However, since it promotes mental health, lower levels of stress, and general satisfaction, one may function optimally in all domains with a balanced existence, which cultivates stronger bonds, more inventiveness and a higher level of satisfaction and the best way to achieve this is by practicing Yoga. Yoga is not just exercise; it is a way of life first discovered and practiced in ancient India for overall improvement. Its meaning is not just to unite body, mind, and soul, but also giving us physical and inner balance.

"Yoga is not a work-out, it is a work-in."

World Oceans Day (8 June)

On World Ocean Day, we at Microfilter Polymers Limited proudly join the global community in celebrating one of Earth's most vital and awe-inspiring natural resources — our **oceans**.

Covering more than 70% of the planet's surface, oceans are the heartbeat of our world. Regulate our climate, provide food and support a vast and diverse ecosystem. Oceans connect us all — no matter where we live.

As a company deeply rooted in water purification and sustainability, we recognize the critical connection between clean water practices and oceans health. Every drop of treated water, and every conscious choice contributes to a cleaner & healthier marine environment.

At Microfilter Polymers Limited, our mission goes beyond providing safe drinking water. We are committed to:

- Promoting sustainable water usage
- Educating communities about water conservation
- Innovating with environmentally friendly technologies

News & Notables

Vidarbha Pani Parishad 2025: A United Voice for Water Wisdom and Action

The Vidarbha Pani Parishad 2025, jointly organized by Rashtrasant Tukadoji Maharaj Nagpur University (NSS) and Janakalyankari Samiti, Nagpur, was held from June 7 to 9, 2025, at Vanamati Auditorium, Dharampeth, Nagpur.

Centered around the thought-provoking theme "Paani Re Paani Tera Rang Kaisa," the Parishad delved into the diverse journey of water—from clouds to soil, rivers to reservoirs, and its varied uses across households, agriculture, and industries.

The event was structured into three focused councils:

- Drinking Water Council
- Agricultural Water Council
- Industrial Water Council

Each day featured expert seminars, region-specific problem discussions, research paper presentations, and inspiring real-world success stories in water management.

To encourage innovation and youth participation, the event also included competitions in reel making, poster design, model exhibitions, and research paper presentations—all under the guidance of subject experts.

Eminent figures from academia, agriculture, environmental sciences, and industry—including Vice-Chancellors, senior bureaucrats, and irrigation and environmental specialists—were part of the Guidance Committee.

The Parishad aimed to create a collaborative platform for dialogue, knowledge exchange, and actionable solutions to water challenges in Vidarbha. Key outcomes included the release of a Charter of Demands, signing of MOUs, and the presentation of a comprehensive regional water management roadmap.

Our CEO Dr. Prashant Agarwal was invited as jury member as our panel discussion on future of regional water Management and its roadmap.

Birthday Celebrations

Mr. Jaideep Padole - CFO

This month, we proudly celebrated the birthday of our esteemed CFO—an inspiring leader whose dedication, integrity, and financial acumen continue to shape the success of Microfilter Polymers Ltd.

Sir, your calm leadership, strategic vision, and genuine support for the team set a standard we all admire. Your guidance goes far beyond numbers—it's a source of confidence for us all.

On behalf of the entire Microfilter family, we extend our warmest birthday wishes. Thank you for your unwavering leadership and mentorship.

Happy Birthday, Sir!

Wishing you health, happiness, and continued success in the year ahead.

Ms. Meena Bisen -Account Assistant

Please join us in celebrating the birthday of Miss Meena Bisen, a valued member of our Accounts team. Her commitment, precision, and positive attitude make a meaningful difference every day.

On behalf of the entire Microfilter family, we wish her a fantastic birthday and a year ahead filled with happiness, success, and good health.

Happy Birthday, Meena

Thank you, for being a part of our journey & wishing you a great year ahead.

World Environment Day

On this World Environment Day, we renew our commitment to sustainability, conservation, and collective responsibility. The 2025 theme, "Land Restoration, Desertification & Drought Resilience," reminds us that environmental health is not just a global issue—it starts with local actions.

At Microfilter Polymers Ltd., we believe clean water is at the heart of environmental well-being. Through our eco-conscious technologies and responsible manufacturing, we continue working towards a future, where every drop counts and every effort matters.

As land degrades and water sources face growing pressure, it becomes even more vital to innovate with purpose and produce with care. Our mission is to not only support water purification but also to contribute to the broader restoration of ecosystems and the resilience of communities affected by climate change.

Let this day be to reflect & a call to action—for businesses, communities, and individuals—to reduce waste, protect natural resources, and build a planet where progress and the planet go hand-in-hand.

Employee Of the Month : Mr. Jaideep Padole - CFO

We are proud to recognize Mr. Jaideep Padole, our Chief Financial Officer, as the Employee of the Month for his outstanding leadership, unwavering dedication, and invaluable contributions to the growth of Microfilter Polymers Ltd.

Mr. Jaideep exemplifies what it means to lead with purpose. With a keen eye for detail and a strong strategic mindset, he has consistently guided the company through key financial decisions that have strengthened our operations and positioned us for long-term success. His ability to balance numbers with vision has been instrumental in driving stability and innovation across all levels.

Beyond his financial expertise, Jaideep Sir is known for his calm demeanor, approachable leadership style, and a genuine commitment to nurturing talent within the organization. He leads by example—motivating those around him to thinking strategically, act responsibly, and strive for excellence.

This recognition is a small token of appreciation for a leader who goes above and beyond, not just in achieving business goals, but in building a positive, collaborative, and forward-looking workplace culture.

Congratulations, Jaideep Padole Sir your dedication continues to inspire us all.
