

NEWS LETTER

March 2026 Edition

From The Chairman's Desk:

Growth means very little if it comes at the cost of the world we leave behind. At Microfilter Polymers Limited, that belief has shaped every decision we've made.

Water is not an infinite resource. And yet, the pressure we place on it through overuse of resources, pollution and the growing demands of industry continues to mount. For us, that's not just a global problem to observe. It's a responsibility to act on.

Everything we build is designed with that responsibility in mind. Our RO systems, STP and ETP solutions aren't simply about treating water they're about conserving it, returning it and making sure it works harder and goes further for everyone who depends on it.

None of this happens without the people behind it. Our team's commitment to doing things the right way not just the convenient way is what keeps this mission moving forward every single day.

As we look ahead, our focus remains steady: build better, operate responsibly and contribute meaningfully to a future where water security is not a luxury, but a necessity.

We are happy to inform all Microfilter teams, investors, bankers and well-wishers that we have met our committed sales goal. Detailed financials to follow soon.

With warm regards and heartfelt thanks,
Mr. Shailendra Mangal
CMD
Microfilter Polymers Ltd.

Microfilter Polymers Limited at the BMA Exhibition – Butibori MIDC

It was a great day at Butibori MIDC and the Microfilter team came away energised.

The BMA Exhibition brought together some of the best minds in the industry under one roof and we made the most of every conversation. Our stall drew genuine interest from visitors who wanted to see, understand and discuss real water treatment challenges. From PP filters, wound cartridges and filter housings to UF membranes and customised RO spare solutions, the response was warm and encouraging.

Our ETP, STP and Industrial RO systems particularly caught people's attention not just for what they do, but for how efficiently and responsibly they do it. That kind of recognition means a lot to us.

More than the products on display, what stood out was the quality of conversations we had. Listening to where the industry is heading, understanding what businesses actually need, and sharing what Microfilter is building that's the real value of events like this.

To everyone who stopped by, asked questions and spent time with our team thank you. You remind us why this work matters. We look forward to the next one.

Message from the Whole-Time Director

Sustainability isn't a buzzword we use lightly. For us, it's the lens through which we approach every product, every process and every problem we try to solve.

The conversation in our industry is shifting and rightly so. Businesses are no longer just asking how to treat water. They're asking how to use less of it, reuse more of it and reduce their dependence on freshwater sources altogether. That shift is exactly where Microfilter is focused.

We're building systems that don't just perform well on paper they deliver real, measurable outcomes in the field. Better filtration, smarter plant efficiency and solutions that genuinely help industries operate with a lighter footprint on the environment.

We don't claim to have all the answers. But we are asking the right questions and working every day to turn those answers into technology that makes a difference.

Responsible innovation is where the future of water treatment is headed. We intend to be right at the front of it.

This month, we are also excited to announce the launch of our products on Flipkart, expanding our reach and making Microfilter solutions more accessible to customers nationwide.

Warm regards,
Mrs. Ritu Mangal
Whole-Time Director
Microfilter Polymers Ltd.

Quote Of The Month

"Sustainability is not a goal to reach but a responsibility to live every day"

Expanding Horizons: A Global Milestone for Microfilter Polymers Ltd.

We are proud to announce a significant milestone in our journey, the successful export of a 75 KLD Sewage Treatment Plant (STP).

This achievement marks an important step in the growth of Microfilter Polymers Ltd., reflecting our evolving capabilities in delivering high-quality, reliable water treatment solutions on a global scale. It is a strong validation of our engineering strength, manufacturing excellence and commitment to meeting international standards.

This project represents more than just an export, it is a testament to our vision of expanding beyond boundaries and contributing to sustainable water management and reuse worldwide.

We would like to take this opportunity to sincerely thank and appreciate all our team members and specially Dr. Prashant Agarwal our CEO who were involved in this project.

From design and planning to manufacturing, coordination and execution. This milestone has been made possible through their dedication, teamwork and relentless effort.

As we move forward, this achievement motivates us to continue building stronger capabilities, delivering impactful solutions and creating a meaningful presence in global markets.

Jai Shri Ram - Ram Navami Celebrated at Microfilter!

The Microfilter Polymers Limited family came together to celebrate the auspicious occasion of Ram Navami with devotion, gratitude and a deep sense of togetherness. The day was marked with a heartfelt pooja as the team gathered to seek the blessings of Lord Ram and celebrate the values of righteousness, strength and integrity that he represents. The festive atmosphere brought a beautiful warmth to our workplace, reminding us all that the values we cherish at Microfilter dedication, honesty and responsibility are rooted in the very same timeless principles. It was a truly blessed and memorable day for our entire family.

New Beginnings & Festive Cheer - Gudi Padwa at Microfilter!

The Microfilter Polymers Limited family welcomed Gudi Padwa in the most beautiful way possible with a heartfelt pooja and the vibrant colours of rangoli filling our space with positivity and warmth. The day began on a deeply meaningful note as the team gathered together to offer prayers, seek blessings for the year ahead and celebrate the spirit of new beginnings. The rangoli added a festive charm that truly set the tone for a joyful and auspicious day. It was a morning filled with tradition, togetherness and a shared sense of hope and gratitude a perfect way to step into a fresh new chapter as one Microfilter family.

Pre-Filter Housing - Small Component, Big Impact

When it comes to water treatment, everyone talks about the big systems the RO units, the membranes, the treatment plants. But the component quietly holding it all together rarely gets the attention it deserves.

The Pre-Filter Housing.

It holds your filtration cartridges in place and channels water through a controlled, sealed

environment. The quality of that housing determines how well your cartridge performs, how long it lasts and whether contaminants are truly being stopped or sneaking through a poor seal.

From residential RO systems and cooling towers to industrial water treatment and ETP/STP pre-treatment stages wherever water needs cleaning, a reliable housing is where it all begins.

A small investment that protects your membranes, extends component life and quietly pays for itself every single day.

Microfilter Spun Filter Receives Amazon Choice Badge

Amazon's **Choice**

Our 10-inch, 1-micron Spun Filter (Pack of 2) has proudly earned the Amazon Choice badge. Known for its extra-fine filtration of dirt, sand and rust, this high-quality polypropylene cartridge enhances RO and purifier performance while delivering reliable, efficient pre-filtration. This recognition reflects strong customer trust and our commitment to quality. Special thanks to our whole time director Mrs. Ritu Mangal for putting in the efforts for this achievement.

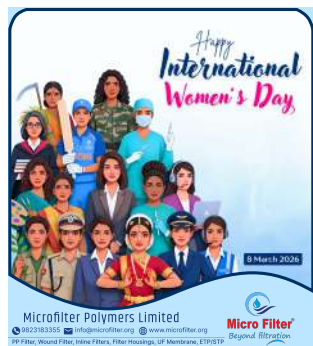

Holi celebration :

Colours, Laughter & Togetherness - Holi at Microfilter!

This Holi, the Microfilter family came together to celebrate the festival of colours with joy, laughter and a whole lot of energy! It was a beautiful reminder that the best workplaces are built not just on hard work, but on moments of togetherness like these. Seeing our team let loose, celebrate and share in the festive spirit made it a truly special day for all of us. Wishing everyone a Happy Holi filled with colour, happiness and good health from our family to yours!

Celebrating the Women Who Make Microfilter Stronger

This International Women's Day, we took a moment to do something we should do more often celebrate the incredible women who are an integral part of the Microfilter Polymers Limited family. Their dedication, resilience and talent inspired everyone around them and the day was a beautiful reminder of the strength they bring to our organisation every single day. We were proud to honour them and grateful for everything they contribute to our journey. It was a day that left everyone feeling appreciated, motivated and reminded of what makes our team truly special.

Birthday Celebration

Priti Binzade - Sales Executive

The Microfilter family took a joyful moment to celebrate our dear Priti Binzade on her special day! Priti's warm presence, dedication and positivity make our team a better place every single day and today was our chance to give that love right back.

The smiles, wishes and celebrations said it all.

Wishing you a year filled with happiness, good health and everything you deserve, Priti. We are so glad to have you as part of our Microfilter family!

Ashvin Wakhariya - Bank Relationship Manager

The Microfilter family came together to celebrate our dear Ashvin Wakhariya on his special day and what a celebration it was! Ashvin's hard work, commitment and cheerful energy make a real difference to our team every

single day and today was all about making him feel as special as he truly is. Wishing you a year ahead filled with good health, happiness and every success you deserve, Ashvin. So glad to have you as part of our Microfilter family!

Water : A Resource Under Threat

Water is the foundation of life, yet it is rapidly becoming one of the most threatened natural resources. Increasing population, industrial growth and climate change are placing unprecedented pressure on freshwater sources.

India, in particular, faces growing water scarcity challenges. Without sustainable intervention, access to clean water may become a privilege rather than a basic necessity in the near future.

Why Sustainability Matters

Sustainability is no longer a choice it is a responsibility. Water conservation is essential to:

- Ensure long-term availability of clean water
- Reduce environmental degradation
- Support industrial and urban growth responsibly

Protect ecosystems and biodiversity

Microfilter's Commitment

At Microfilter Polymers Limited, sustainability is embedded in every solution we create. Our focus is to:

- Deliver efficient water purification systems
- Minimize water wastage
- Promote reuse and recycling of water

Our technologies are designed to balance performance, efficiency and environmental responsibility.

Employee of the Month - Jaideep Padole (Chief Financial Officer)

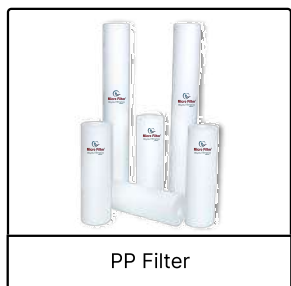

We are thrilled to announce and celebrate our Employee of the Month Jaideep Padole, Chief Financial Officer, Microfilter Polymers Limited!

Jaideep's contribution to Microfilter goes far beyond numbers and financial strategy. His sharp thinking, calm leadership and unwavering commitment to excellence have been a driving force behind some of our most important decisions and milestones. Month after month, he shows up with purpose, precision and a dedication that inspires everyone around him.

This recognition is truly well deserved, Jaideep and it is only a small reflection of the immense value you bring to this organisation every single day. The entire Microfilter family is proud of you and grateful to have you leading from the front.

Here's to you, Jaideep keep inspiring us all!
